1. Executive Director  
7D55, HQS.

Jim,

Per our conversation, how  
does this look? Any ideas?

Stan

MEMORANDUM FOR: Director of Training and Education

FROM: Chief, Career Trainee Division,  
Training Branch

SUBJECT: Request for Information on Career Trainee  
Development Course (CTDC) Coverage of Emerging  
Technologies

1. In response to your request of 31 July 1985, I am writing to describe CTDC sessions whose focus is on, to a lesser or greater degree, emerging technologies. At our request, the Office of Research and Development (ORD) put together a special 90 minute panel presentation on emerging technologies that are especially relevant for intelligence officers. The session was focused largely on the future of planar silicon, gallium arsenide, computers and super computers, and biotechnology. Beginning with the January 1985 CTDC, this session evolved to the point where it is a mainstay in the Science and Technology collection phase of the CTDC. To a lesser degree, two talks in the International Economics instructional block focus on emerging technologies. One is entitled Human Source Collection in the Economic Area: East Asia Division, the second Human Source Collection in the Economic Area: Europe Division. Directorate of Operations case officers or reports officers give these talks. Among other things, they focus on microcircuitry and ceramics. Elsewhere in the CTDC CTs see examples or are told of high technology as it impacts on the Agency. They are exposed to satellite systems, computers, computer chips. small

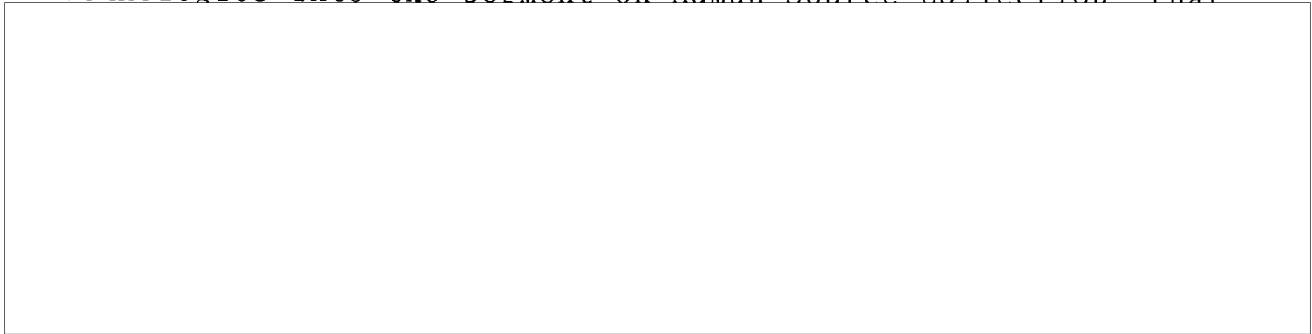

CIS are also assigned articles as a part of the reading they do during the S&T segment of the course. [redacted]

Technologies

2. If you determine that we are not making a sufficient link between emerging technologies and the work of the case officer, I would propose three possible solutions, all of which we could easily do, that we move the talk on emerging technologies into the segment on Human Source Collection that
